EVERYONE COUNTS

During a mass incident or disaster, your site can become overwhelmed with responders, volunteers, and civilians - invited or not. A top priority is establishing site security and access control. rapidTAG™ allows all responders to be quickly issued an incident-specific badge complete with site permissions, expiration date, and a fireTRAX® compatible barcode for electronic accountability.

-- INCIDENT SPECIFIC BADGING --

rapidTAG™ is an incident badging system that captures data from state issued drivers licenses to create incident specific credentials, eliminating the choke point at check-in, while meeting federal, state, and NFPA requirements for personnel accountability.

-- SITE SECURITY --

rapidTAG™ badges display site permissions with respect to areas accessed (eg., Hot Zone), functions performed (eg., Hazmat), with an expiration date and time.

-- VOLUNTEER MANAGEMENT --

Badge all civilians and volunteers at site including public health, public works, government officials, and the press. Each badge displays permitted locations and functions for the volunteer as well as an expiration date.

-- ACCOUNTABILITY --

rapidTAG™ badges include a fireTRAX® compatible barcode so you can automate the accountability process throughout the incident. Just scan rapidTAG™ badges to quickly and accurately determine **WHO** is at site with **WHAT** qualifications, **WHERE** are they located or assigned, **WHY** they are at site (function), and **WHEN** did they arrive/depart.

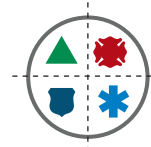

rapidTAG™ INCIDENT BADGING SOLUTION

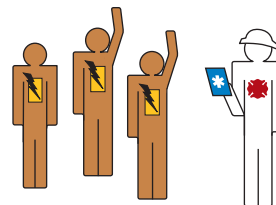

MAKE TEMPORARY BADGES (VISITOR TAGS)

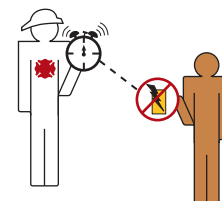

SITE SECURITY & ACCESS (EGRESS MANAGEMENT)

UNITE MUTUAL AID (REPLACE OR CREATE RESPONDER TAG IF NOT PRE-CREDENTIALLED)

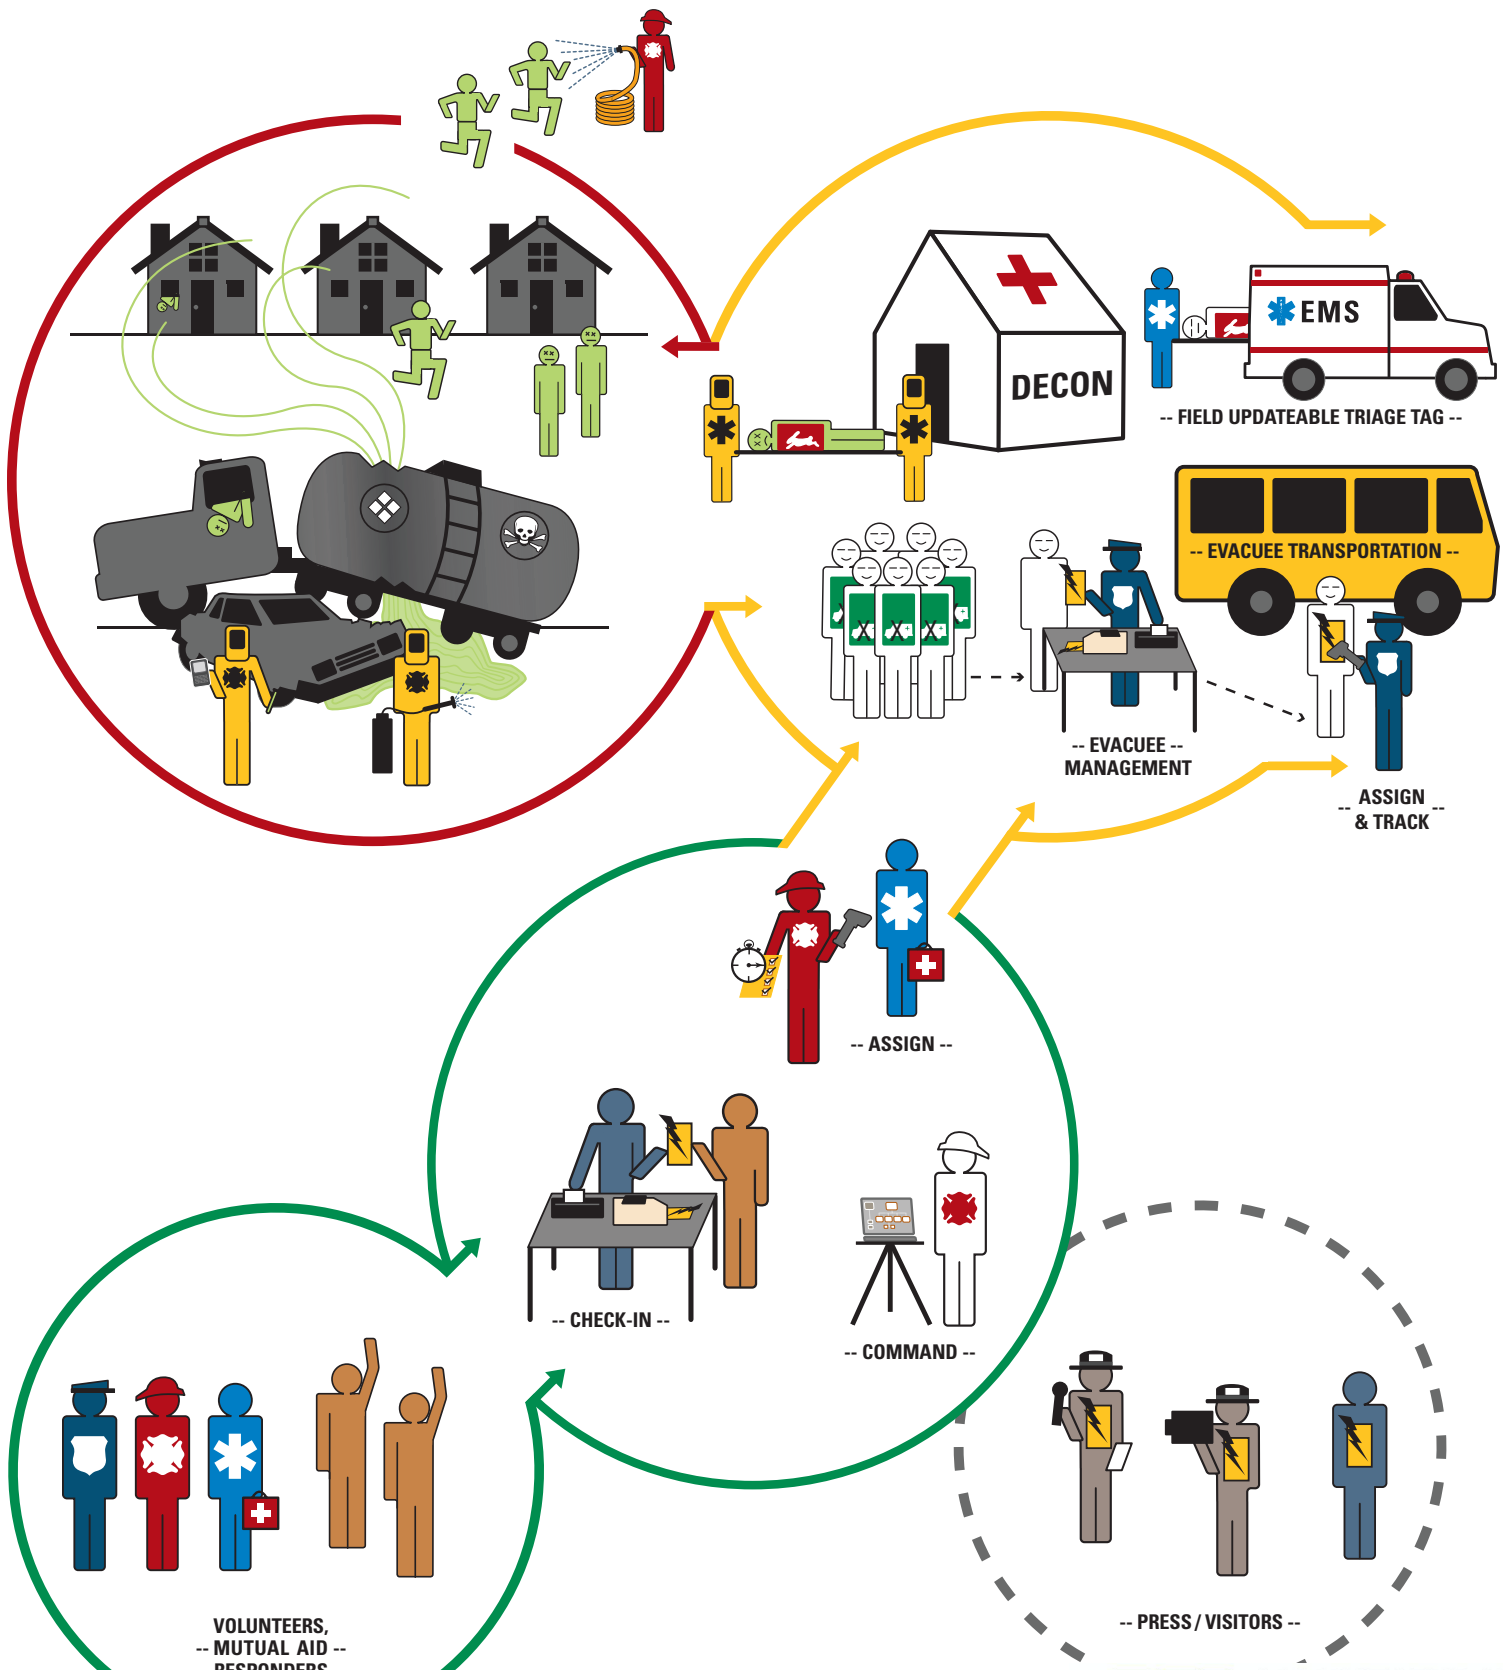

VOLUNTEER / EVACUEES ACCOUNTABILITY

SITE EXPIRATION MANAGEMENT TIME & ATTENDANCE
